EDUCATION

B.Tech - Information Technology | Meerut institute of engineering and technology, Meerut, India 2023-2027 | CGPA:7.7 /10

PROJECTS

1. Virtual Assistant:

Developed a web-based virtual assistant using HTML, CSS, and JavaScript

2.AI-Based Crop Recommendation for Farmer

Built a system to suggest suitable crops using Python and Flask

Used SQLite database for storing agricultural data.

Helped farmers make data-driven decisions.

3. SuperMarket OS – Inventory Management System

Built a full-stack Supermarket Inventory Management System (React, Express, Prisma, SQLite) with REST APIs for stock, sales, and audit logging.

Implemented dashboard analytics (revenue, profit, expiry alerts), pagination, CSV export, and debounced search with autocomplete.

Wrote 10 automated tests (100% pass) and validated safety checks like blocking expired-item sales.

4.Fake Job & Internship Detection System(Ongoing)

Developing a system to detect fraudulent job postings.

Using machine learning and data analysis techniques.

Focused on improving online job platform safety.

TECHNICAL SKILLS

- Programming Language: C, Python
- Web Development: HTML, CSS, JavaScript
- Cloud & Database: AWS (Basic), Linux , SQL, MySQL, MongoDB
- Networking: Basic Computer Networking
- CS Fundamentals: Database Management System (DBMS), Data Structure and Algorithms
- Tools - VS Code, Git, GitHub, Linux, HackerRank, LeetCode

SOFT SKILLS

- Quick learner
- Problem-Solving Skills
- Teamwork and communication

CERTIFICATES

- **MongoDB Certification** - Database Fundamentals and usage
- **ServiceNow University** – 2,535(Credits) ,Basic of cloud platform
- **Forage Simulation** – Solution Architecture job Simulation
- **Full Stack Web Development** – Digital heroes
